

Project Initialization and Planning Phase

Project Name:	<i>Nutrition App Using Gemini Pro</i>
Team ID:	<i>SWTID1720075968</i>
Team Members:	<i>Ramya Rajesh Nair</i> <i>Sunku Peda Akshay</i> <i>Pendekanti Saikarthik</i> <i>Sowmya Chowdary Gogadi</i>

Project Proposal (Proposed Solution) report

The project aims to create a robust and user-centric nutrition app, Nutritionist AI, leveraging Gemini Pro's advanced AI capabilities to address the challenges of conflicting dietary information, lack of personalized plans, and insufficient motivation hindering users from achieving their health goals.

Project Overview:

Objective:- The primary objective is to empower individuals with personalized dietary recommendations and guidance through an innovative mobile application leveraging Gemini Pro's advanced AI capabilities.

Scope:- Promote healthy eating habits and enhance overall well-being by providing tailored meal plans, nutritional insights, and comprehensive educational resources.

Problem Statement:

Many individuals face challenges such as conflicting dietary information, difficulty finding personalized plans, and lack of motivation and support, which hinder them from achieving their health and wellness goals.

Proposed Solution:

To create a robust and user-centric nutrition app, Nutritionist AI, leveraging Gemini Pro's advanced AI capabilities to address the challenges of conflicting dietary information, lack of personalized plans, and insufficient motivation hindering users from achieving their health goals. Develop a user-friendly mobile application, Nutritionist AI, that harnesses Gemini Pro's cutting-edge AI technology.
